A DIGITAL CONTACT MANAGEMENT SOFTWARE

WEB APPLICATION DEVELOPMENT – SUPPORT

ABOUT PROJECT

Our client, a corporate company, required a software for employee contact details management in order to send event invites to everyone at once. Their idea was to automate the process of sending invites to every individual manually.

THE REQUIREMENT

- A replacement for the excel sheets for storing contact information.

- A system to send event invites to all the listed contacts at once

- Functionality of sending invitations to employees belonging to different time zones.

> "We enabled a solution that automated the process of sending event invites to all the listed contacts keeping in mind the time zone variation of every receiver."

A DIGITAL CONTACT MANAGEMENT SOFTWARE

Communication

Technology
Code Igniter | **PHP**

THE CHALLENGES

- Invites sent out in a particular time-zone to be automatically modified according to the receivers time-zone.

- Seamless synchronisation and record keeping of every employee response to every invite.

KEY FEATURES

- A completely automated system that can send event invites to all the listed contacts in one go.

- A consolidated view of event attendees with status display of people invited, those who accepted the invite, those not attending and those who still have not responded.

- A functionality that enables the invite receiver to accept the invitation

- Invite recipients can directly add the event details to their calendar in accordance to the local time zone.

THE BENEFITS

Ease of sending event invites

Reduced manual efforts and time saving

Getting an early estimate of people attending the event.

Automation of invites sent to different time zones.

Ease in Access of Employee Contacts due to Digital Contact Book.
