

TRANSFORMING POINT OF SALE SYSTEM DIGITALLY

Industry

POS

Technology

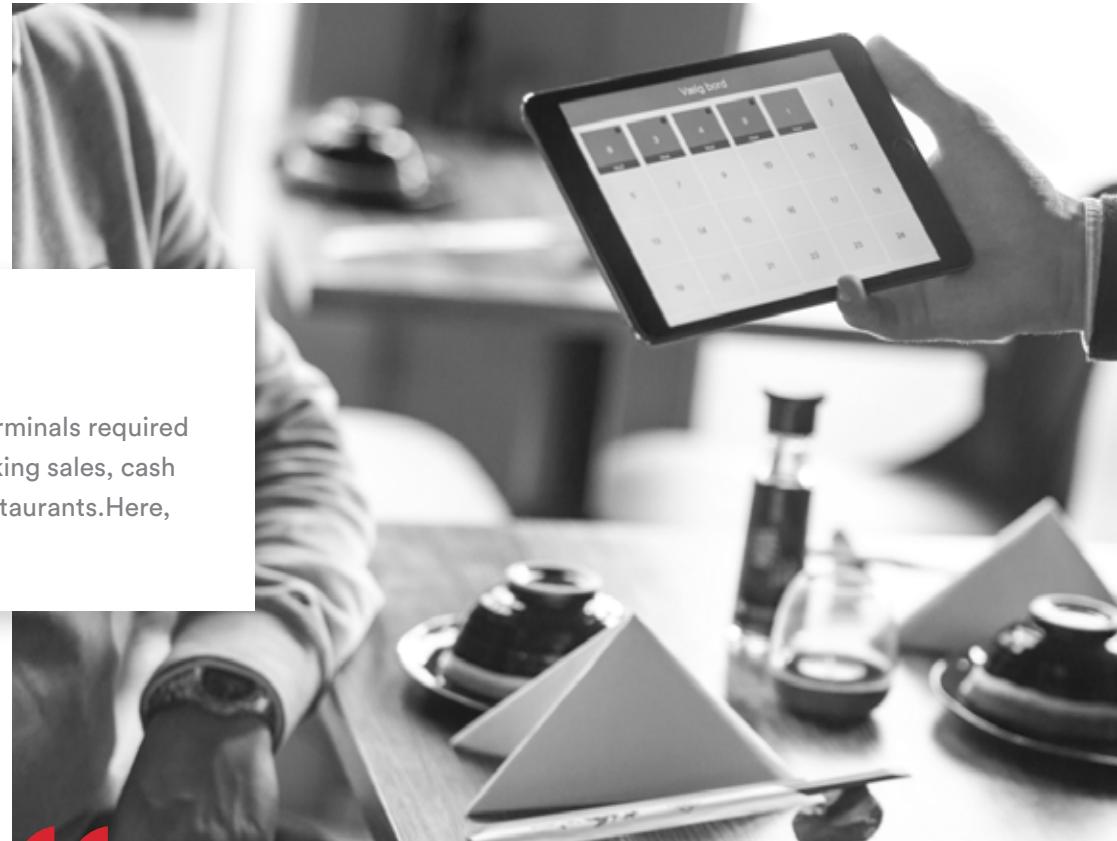

Microsoft | Symfony | PHP | Magento
.NET

ABOUT PROJECT

Our client from Norway, a leader in cashier system and payment terminals required a solution (POS) that can automate the process of recording & tracking sales, cash flow, inventory, book-keeping etc. to simplify the operations for restaurants. Here, we were looking at Digital Transformation.

THE REQUIREMENT

- Touch Enabled POS for Handling Huge Customer Base
- Upgrade in New Age Technologies – SaaS based Solution
- Interesting User Friendly Interface
- New Features for Simplified & Better Customer Experience

“ The SaaS-based solution enabled centralized storage, real-time access and updates in data and enhanced security, mobility and capability by integrating multiple sales channel. ”

TRANSFORMING POINT OF SALE SYSTEM DIGITALLY

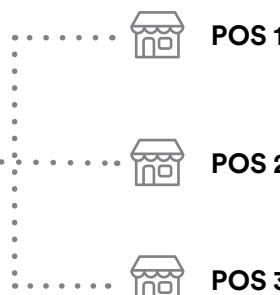

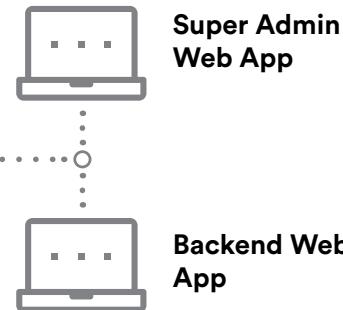

Industry
POS

Technology
Microsoft | Symfony | PHP | Magento
.NET

— SYSTEM ARCHITECTURE
